

FORWARD THINKING...

MTM ENGINEERING

Company Environmental Policy

We recognise that our activities have an impact on both the natural and social environment. Care for the environment is one of our key responsibilities and an important part of the way in which we do business. We strive to maintain the environmental impacts within legal and socially acceptable limits. Our policy towards achieving this goal is founded on our commitment to:

- Complying with all relevant environmental legislation, regulations and approved codes of practice
- Protecting the environment by striving to minimise our contribution to pollution of land, air and water
- Seeking to keep waste to a minimum and maximise the efficient use of materials, energy and other resources
- Managing and disposing of all waste in a responsible manner
- Developing our management processes to ensure that environmental factors are considered during planning and implementation

The company is committed to the concept of continuous improvement and to this end we have implemented an Environmental Management System in accordance with the requirements of the international standard ISO 14001:2015. Environmental objectives are established and regularly reviewed in the context of continual improvement and the company's ethos of Forward Thinking.

Our people, the MTM Engineering team, are core to achieving the intentions of this policy and its related objectives. Training, development and continuous communication are key processes within our operations. We are committed to continuously improving the skills of our team to ensure the continuous improvement of our services.
